Zetclass User Guide · 2

School Admin: register and set up

For the person who signs the school up for the first time, and who then runs the school's account.

Who: the school owner or authorised representative **Last updated:** 5 Nov 2026

App version: 20261125

In this guide

- Part 1 · Register your school (first time)
- Part 2 · Set up the school profile
- Part 3 · Verify that you own the school
- Part 4 · Add, rename and remove staff and parent accounts
- Part 5 · Subscribe after the free trial
- Part 6 · Back up your data
- Part 7 · Sample data
- Part 8 · Register students and staff (direct entry or template upload)

Part 1 · Register your school (first time)

WORDS IN THIS SECTION

Register	Create your school's account on Zetclass for the first time.
Free trial	The first 30 days are free. No card or payment details needed.
Portal address	Your school's own link, like zetclass.com/st-marys. You choose it when you register.
Region, District, Locality	Where the school is: the region (like Ashanti), the district (like Kumasi) and the town or area (like Adum).
Required (*)	A box you must fill in. A red star marks it.

BEFORE YOU START

Only the **owner or an authorised representative** may register a school. Registering a school you are not allowed to represent is a false claim and can make you personally liable. Zetclass records your confirmation.

Have ready: the school's full name; its email address (reset links go here); a phone number for calls; the region, district and town; and a password of at least 8 characters.

1. Go to `zetclass.com` and tap **Sign up and start your free 30-day trial**. [On a phone it is also the **Sign up** link in the top bar.] Or go straight to `zetclass.com/signup`.

2. **Your school** · type the **School name** in full. Choose your **Country** (Ghana is already selected).

3. **How we can reach you** · type the **School email address** and the **School phone number (for calls)**. Type only the main number, e.g. `24 123 4567`: the country code (+233) is added for you. A **WhatsApp number** is optional, only if it is different from the phone.

4. **Where is the school?** · choose the **Region**, then the **District / municipality** (the list changes to match your region), then type the **Locality / area**.
   - District not listed? Choose **Other (not listed)** at the bottom of the list.
   - Outside Ghana? Type your region, state or province instead.

5. **Your school's portal address** · this becomes your school's link, e.g. `zetclass.com/st-marys`. Zetclass suggests three from your school name: the **main name** (without words like Primary or JHS), the **full name** with no hyphens, and the **main name plus details** (e.g. `achimota-jhs`). Tap one, or type your own. It must include part of your school's name or its initials. A green ✓ **Available** means it is free. Then tick **I agree that … is added to zetclass.com as my school's portal address**.
   - Choose carefully: it is used on sign-in links, notices and QR codes, and cannot be changed later without contacting Zetranova.

6. **Secure your account** · type a **password**. The coloured bar shows how strong it is. It is only advice: you can still register with a weak password, but a strong one protects your school.

7. **Optional details** · add the school's **Website** and **Postal address** if you like, or skip them.

8. **Before you start** · leave **Start with sample data** ticked if you want to explore with pretend records. Tick **I am the owner or an authorised representative…** and tick **I agree to the Terms of Service and Privacy Notice**. Both are required.

9. Tap **Create my school**.

CHECK

A page says **Your school is ready** and shows your school's portal address, your username (`admin`) and your free-trial end date. Tap **Copy these details** and keep them safe, then tap **Open my school**.

GOOD TO KNOW

Each school name, email address and phone number can be registered **once**. If "St. Mary's Basic School" is taken, add your town, e.g. "St. Mary's Basic School, Kumasi". Required boxes are marked with a red * and the word *Required*; the others say *Optional*.

If registration does not go through

You see	What to do
A red message under a box	Fix that box. Messages appear next to the Create button and under the box itself.
"A school called … is already registered"	If it is yours, sign in instead. If it is a different school, add your town to the name.
"already registered with this email or phone"	Sign in instead, or contact Zetranova if you need a second school.
"Too many sign-up attempts"	Wait an hour and try again, or contact Zetranova.

Part 2 · Set up the school profile

WORDS IN THIS SECTION

Profile	Your school's basic details: name, address, phone, logo and stamp.
Academic year and term	The school year (like 2026/2027) and the term you are in now.

1. Sign in (see Guide 1). Choose user type **Admin**, username `admin`.
2. Open **Settings** [left menu] and the **Profile** tab.
3. Check the school name, address, country, region, district, locality, phone, WhatsApp, email and website. Add the **logo**, **signature** and **stamp** images if you have them.
4. Tap Save changes.
5. Visit the **Academic** tab (year and term) and **Classes & Subjects** to match your school.

Part 3 · Verify that you own the school

WORDS IN THIS SECTION

Licence number	The number on your school's official licence or registration, for example from NaSIA or the Ghana Education Service.
Verified	A green mark that Zetranova adds after checking that you really own or represent the school.

Verification protects real schools from people who pretend to be them. Zetranova checks your licence number and may phone you.

1. Open the **Subscription** page [tap **Manage subscription** in the banner at the top, or use the left menu].
2. In the **Verify your school** card, type your **Licence / registration number**.
3. Tap Submit for checking. You can also tap Tell us on WhatsApp to send it.

CHECK

The card says "We have your number…". When Zetranova has checked it, the card changes to a green **Verified** ✓. If you change the number later, the Verified mark is removed until it is checked again.

Part 4 · Add, rename and remove staff and parent accounts

WORDS IN THIS SECTION

Account	One person's sign-in: user type, username and password.
User type	Teaching staff, Non-teaching staff, Admin, Director or Parent / guardian.
Username	The name a person types to sign in. It must be different for everyone.
Reset password	Give someone a new password.

IMPORTANT

Only the school Admin can add, rename or remove accounts and reset other people's passwords. Everyone else can only change **their own password**.

Add an account

1. Open **Settings** → the **Access Control** tab.

2. In **Login accounts**, tap + Add login account.

3. Type the person's **Full name**. Choose their **User type**: **Teaching staff**, **Non-teaching staff**, **Admin**, **Director** or **Parent / guardian**.

4. Optional: use **Link to staff/parent record** to connect the login to their record.

5. Type a **Username** (letters, numbers, dots, dashes or underscores, no spaces, e.g. `k.mensah`). Each username must be different from everyone else's at your school.

6. Type an **Initial password** (at least 8 characters). Tap Create.

7. Tell the person four things: **school name, user type, username, password**, and that they sign in at `zetclass.com`. They are asked to choose their own password at first sign-in.

Rename a username, reset a password, or remove an account

In the same **Login accounts** table, each row has three buttons:

- Rename username · type the new username and save. Tell the person: their password stays the same.
- Reset password · type a new password twice and save. They must change it when they next sign in.
- Remove · confirm. They can no longer sign in. Records they created (pupils, scores, payments) are **not** deleted.

RULES THAT PROTECT YOU

Usernames are never duplicated (capital letters are ignored). You cannot remove the account you are signed in with, and the school must always keep at least one Admin.

TIP

Give staff their school's own link (`zetclass.com/your-school`) so the school name is already filled in when they sign in.

Part 5 · Subscribe after the free trial

WORDS IN THIS SECTION

Plan	Basic, Growth or Premium. It depends on how many pupils you have.
Mobile Money (MoMo)	Paying with your phone number.
Transaction ID	The code you get after paying. You send it so we can confirm.
View only	If the trial or subscription ends you can look at everything but not change it. Your data is safe.

1. Open the **Subscription** page.
2. Look at the **Plans** table and pick **Basic**, **Growth** or **Premium** by the number of pupils.
3. In **How to subscribe**, tap Message us on WhatsApp. The message is written for you with your school's details.
4. Pay by **Mobile Money** to the MoMo number and Merchant ID shown on that page.
5. Send the **transaction ID** on WhatsApp. Zetranova confirms your payment.

CHECK

The Subscription page shows **Active** and a new **Paid until** date. If the trial or subscription ends, the school becomes **read-only** (everything visible, nothing editable) until you renew. Your data is not deleted.

Part 6 · Back up your data

WORDS IN THIS SECTION

Backup	A copy of your information, kept safe in another place.
Export	Download your school's information as a file.
JSON file	The kind of file Zetclass downloads. You do not need to open it. Just keep it safe.

1. Open **Settings** → the **Data** tab.
2. Tap Export data (JSON). A file downloads to your device.
3. Keep the file somewhere safe, such as your email or a flash drive. Do this at least once a month, and before any big change.

CAREFUL

Import data and **Reset** on the same page replace the school's records. Use them only if you are sure.

Part 7 · Sample data

WORDS IN THIS SECTION

Sample data	Pretend pupils, fees and records so you can practise. You can remove them in one tap.

If you kept **Start with sample data** ticked, you have pretend pupils, fees, attendance, scores, stock and accounts. When you are ready for real records:

1. Open **Settings** → the **Sample Data** tab. [Or use the banner on the dashboard.]
2. Tick the groups to remove and tap the remove button. Confirm.

Records you added yourself are not touched. You can add the sample groups back any time from the same tab.

Part 8 · Register students and staff

WORDS IN THIS SECTION

Direct entry	Typing one pupil or staff member into a form.
Template	A blank spreadsheet with the right columns. Zetclass makes it from your own form, so it is always up to date.
CSV file	A simple spreadsheet file that opens in Excel or Google Sheets.
Upload	Sending your filled spreadsheet back into Zetclass.

There are two ways. Use whichever is easier.

Way 1 · Direct entry

1. **Students:** open **Students** and tap `+ Admit student`. **Staff:** open **Administration** → staff and tap `+ Add staff`.
2. Fill in the form. Boxes marked * are required. Tap `Save`.

Way 2 · Download a template, fill it, upload it

1. On **Students**, tap ⭳ New-admissions template. (For staff: ⭳ New-staff template on the staff page.) A spreadsheet file downloads.

2. Open it in Excel or Google Sheets. The first row shows the column names; a * means required. The next two rows start with `#GUIDE` and `#EXAMPLE` and show what to type. **Delete those two rows** (they are skipped anyway).

3. Type one student per row. Dates look like `2018-05-01` (day/month/year such as `05/03/2018` also works). For choices, type one of the listed options. For Yes/No boxes type `Yes` or `No`.

4. Save the file as **CSV**. Tap ⭱ Upload new admissions and choose the file.

5. Zetclass shows how many rows are valid and lists any problem rows with the line number and reason. Tap **Import** to add the valid ones. Fix the rest in your file and upload again.

THE TEMPLATE ALWAYS MATCHES YOUR FORM

The template is built from your **Admission Form** (Settings → Admission Form). If you add, rename or remove a field there (for example "Parent occupation type"), **download a fresh template** and the new column is there. An older template still works: columns it does not have simply stay empty, and Zetclass tells you which ones.

TO CORRECT STUDENTS ALREADY ON ROLL

Use **Update existing student records** on the Students page: download the data template for a class or one student (it comes pre-filled), change what you need, keep `student_id` unchanged, and upload it back. Only the columns in your file are changed.

NOTE

Staff forms have fixed fields today, so the staff template does not change when you edit the student Admission Form.

Tips

- Use a strong password and do not share the Admin login. Create separate accounts for other people.
- Keep the school's registered email working: password reset links are sent there.
- Write down the username and password for each new account only on paper you keep safe, and ask people to change their password at first sign-in.

Update log

Date	App version	What changed
5 Nov 2026	20261118	First edition. Registration with country, region, district and locality; ownership confirmation and Verified mark; account rules (only Admin adds, renames, removes).
5 Nov 2026	20261119	Added Part 8: registering students and staff (direct entry or template upload). Student templates now follow the Admission Form automatically.
5 Nov 2026	20261122	Registering now includes choosing and agreeing your school’s portal address (three suggestions, live check, tick box).
