Zetclass User Guide · 3 · Owner only

App Admin: the owner control room

For the Zetclass owner. See every school, manage trials and payments, and check ownership.

Who: the Zetclass owner (Zetranova) only **Last updated:** 5 Nov 2026

App version: 20261125

KEEP THIS PRIVATE

The control room can see and change every school. Never share the login, and never leave it signed in on a shared computer. Schools never see this screen.

Special section: where school data is saved →

Where every school's information lives, how it is kept separate, and how to back it up. Filed with this guide.

In this guide

- Part 1 · Sign in to the control room
- Part 2 · Tour of the Schools screen
- Part 3 · Check a school's ownership (do this before taking payment)
- Part 4 · Record a payment and manage the free trial
- Part 5 · Help a school: passwords, edits, log in as the school
- Part 6 · Add a school by hand · suspend · reset · delete
- Part 7 · The activity log

Part 1 · Sign in to the control room

WORDS IN THIS SECTION

Control room	Your private screen at zetclass.com/admin. Schools never see it.
Platform account	Your own sign-in. It is separate from every school's sign-ins.

1. Go to `zetclass.com/admin`. [Type exactly **admin**: there is no `.com/admi`.]
2. In **Platform username**, type the owner username.
3. In **Password**, type the owner password. Tap Sign in.

CHECK

You see **Zetranova Platform** at the top and a **Schools** page with count tiles.

WHERE THE LOGIN IS KEPT

The owner username and password are not stored in the app's records. They are kept (as a scrambled value) in a private settings file on the hosting server. To change them, ask your developer or assistant: do not post them in chats.

To sign out: tap your name [Platform ▾] at the top right and choose **Log out**.

Part 2 · Tour of the Schools screen

WORDS IN THIS SECTION

School	One customer school with its own private space.
Tile	A box at the top that counts schools. Tap it to filter the list.
Tag	A small label by a school's name: New, Verified, Check licence or Not verified.

- **Tiles** at the top count your schools: *Schools, On free trial, Paid, Ending ≤ 7 days, Ended, Suspended*. Tap a tile to filter the list.
- **Search box** finds a school by name, email, phone or portal address. The menu next to it filters the same way as the tiles (plus *New this week*).
- **Table** columns: School, Contact, Subscription, Plan, and a **Manage** button.
- **Tags** under a school's name: New (joined this week), **Verified** (ownership checked), **Check licence** (the school gave a licence number, waiting for you), **Not verified** (no number yet).
- **Password help requests** card (appears when needed): Admins who pressed "Forgot password". See Part 5.
- Activity log and + Add school buttons at the top right.

Part 3 · Check a school's ownership (before taking payment)

WORDS IN THIS SECTION

Licence number	The number from the school's official licence. You check it with NaSIA or the Ghana Education Service.
Verified	Your mark that you have checked the school's owner.
Impostor	Someone pretending to be a school's owner.

1. Tap Manage next to the school. The first section is **Ownership check**.

2. Read the **Licence / registration number given by the school**.
3. Look it up with the issuing body, e.g. **NaSIA** for private schools or **GES** for public ones.
4. Call or WhatsApp the school's phone number on file (shown under **Contact & notes**). Confirm the person really is the owner or an authorised representative.
5. In the box, write how you checked, e.g. `NaSIA no. confirmed; called owner 5 Nov`.
6. Tap Mark as Verified.

CHECK

The section shows a green **Verified** with the date and your note. The school's own Subscription page now shows **Verified** ✓. To undo, tap **Remove Verified mark** and give a reason (recorded in the activity log).

WHY THIS MATTERS

Anyone can type a school name into the sign-up form. Verification stops an impostor from running a school's account or paying in its name. While a school is not Verified, the **Subscription** section shows a warning above **Record a payment**.

Part 4 · Record a payment and manage the free trial

WORDS IN THIS SECTION

Plan	Basic, Growth or Premium.
Paid until	The date a payment runs to. After it the school can only look, not change.
Transaction ID	The code from the school's Mobile Money payment.

When a school has paid

1. The school sends its MoMo **transaction ID** on WhatsApp. Confirm the money arrived in your MoMo account.
2. Tap Manage next to the school → **Subscription** section.
3. Under **Record a payment**, choose the **Plan** (Basic, Growth or Premium) and the period: **1 term**, **2 terms**, **Full year**, or **Pick an end date…**.
4. Optional: type the **amount** and a **note** such as the MoMo reference.

5. Read the line that says "School will be paid until …". Tap **Record payment**.

CHECK

A message says "Payment recorded". The school shows **Paid** with its new date. Renewals add to any time already paid.

Extend a free trial

In the same **Subscription** section, under **Free trial**, tap **+ 1 month**, **+ 2 weeks** or **+ 3 months**; or type a number of days and tap **Add days**; or choose an exact date and tap **Set date**.

CAREFUL

Extending a trial on a school that has already paid replaces its paid date. The screen asks you to confirm first.

Part 5 · Help a school

WORDS IN THIS SECTION

Temporary password	A one-time password you give a school. It must change it at first sign-in.
Log in as this school	Opens that school's account so you can help. It is limited in time and recorded.
Private notes	Notes only you can see.

A school Admin forgot their password

1. Look at **Password help requests** on the Schools page. It lists Admins who pressed "Forgot password" and whether their email was sent.
2. Confirm it really is the school: tap **WhatsApp them** or call the number on file.
3. Tap **Issue temporary password** and confirm. A box shows the one-time password and a ready-made WhatsApp message.
4. Send it to the school. They sign in and choose their own password. Tap **Dismiss** on the request when done.

OTHER ACCOUNTS

Teaching and non-teaching staff and parents ask **their own school Admin** to reset passwords. You only need to help Admins. In **Manage** → **Login accounts** you can also reset a password or disable an account for any user.

Correct a school's details

Manage → **Contact & notes** → **Edit school details…** lets you change the name, contact person, email, phone, WhatsApp, website, country, region, district, locality and postal address. The portal address (e.g. `zetclass.com/st-marys`) cannot change. Use **Private notes** for your own reminders (schools never see them) and tap **Save note**.

See what a school sees

Manage → **Support tools** → **Log in as this school** opens the school as its Admin, for a limited time. The screen shows a banner while you are in. This is recorded in the activity log. **Activity for this school** shows its history.

Part 6 · Add a school by hand · suspend · reset · delete

WORDS IN THIS SECTION

Suspend	Pause a school. It can only look. You can undo it.
Reset	Wipe a school's records but keep its account.
Delete	Remove a school completely. This cannot be undone.

Add a school by hand

1. Tap + Add school [top right].
2. Fill in **School name**, **Contact person** (becomes the first Admin), **Email**, **Phone / WhatsApp** and, if you want, a **Portal address**.
3. Leave the sample-demo box unticked for a real school. Tap Create.
4. A box shows the school's **temporary password** and a WhatsApp message to send. Hand it over: the school must change it at first sign-in.

Suspend, reset, delete

- **Suspend school / Reactivate school** (Manage → Support tools): pauses or restores a school. Suspended schools are view-only.
- **Reset school data…** (Danger zone): wipes every pupil, staff member, payment and record, keeps the account and subscription, and gives a new temporary password.
- **Delete school permanently…** (Danger zone): removes the school and all its data. Use it for **test signups**, or when a school asks for its information to be erased.

CANNOT BE UNDONE

Reset and Delete cannot be reversed. The screen asks you to confirm by typing. Export the school's data first if there is any chance it is needed (the school Admin can do this from Settings → Data).

Part 7 · The activity log

WORDS IN THIS SECTION

Activity log A permanent list of everything done in the control room.

1. Tap Activity log [top right of the Schools page] for everything, or **Activity for this school** inside Manage for one school.

2. Each line shows the time, what happened (e.g. *School signed up, Recorded payment, Marked school as Verified, Issued temporary password*) and the details.

Entries cannot be edited or deleted from the app. For signups, the log also shows that the person confirmed they are the owner or authorised representative, and from which internet address.

Tips

- Check ownership **before** you record a payment.
- Delete your own test schools after you try the signup.
- If a school says it never got the reset email, check Spam, then use the temporary password route.

Update log

Date	App version	What changed

5 Nov 2026	20261118	First edition. Control room tour, ownership check (Verified), payments, trials, password help, activity log.
